Subject: Diridon Caltrain Station San Jose (Regional Water Board case # 43S1111) - well destructions

Mr. Chao,

We have reviewed the case and it is a candidate for low-threat closure. Please proceed with the destruction of the groundwater monitoring wells consistent with Santa Clara Valley Water District groundwater monitoring well destruction requirements. Peninsula Joint Powers Board is required to submit a well destruction completion report by **December 29, 2017**. If there are delays, please submit a request for extension at least 1 week before the due date. Please email me in advance of the well destruction schedule.

After receiving the well destruction completion report, we intend to close the case. Prior to issuing a 'no further action letter' (NFA), you are required to ensure all files have been uploaded to Geotracker. Feel free to contact me to discuss. Prior to issuing the NFA, you may be requested to review the draft case closure summary, and prepare a public notice (fact sheet). I will confirm at a later date.

Regards,
Celina Hernandez, PG
