

Where your electricity comes from

PG&E meets our area's energy demands with a diverse mix of energy sources that are over 85 percent greenhouse gas free. We supplied 39 percent of the electricity our customers use from renewable resources that qualify under California's Renewables Portfolio Standard.

PG&E reached California's 2020 renewable energy target three years ahead of schedule and we are on our way to meet the state's new 60 percent by 2030 renewable energy target.

2018 POWER MIX

PG&E-owned generation and power purchases

***Greenhouse gas free and/or renewable resources**

The figures above may not sum to 100 percent due to rounding.

PG&E delivers a range of clean energy resources, such as solar, wind, hydropower, and nuclear and is also integrating innovative technology to make the power grid smarter and more resilient.

PG&E's 2018 Power Content Label as reported to the California Energy Commission.¹

ENERGY RESOURCES	PG&E 2018 POWER MIX			2018 CA POWER MIX ² (For Comparison)
	Base Plan	100% Solar Choice	50% Solar Choice	
Eligible Renewable:	39%	100%	69%	31%
• Biomass and waste	4%	0%	2%	2%
• Geothermal	4%	0%	2%	5%
• Small hydroelectric	3%	0%	1%	2%
• Solar	18%	100%	59%	11%
• Wind	10%	0%	5%	11%
Coal	0%	0%	0%	3%
Large Hydroelectric³	13%	0%	6%	11%
Natural Gas	15%	0%	7%	35%
Nuclear	34%	0%	17%	9%
Other	0%	0%	0%	<1%
Unspecified⁴	0%	0%	0%	11%
TOTAL	100%	100%	100%	100%

¹ The figures above may not sum to 100 percent due to rounding.

² Percentages are estimated annually by the California Energy Commission based on the electricity generated in California and net imports as reported to the Quarterly Fuel and Energy Report database and the Power Source Disclosure program.

³ A significant amount of energy generated by PG&E comes from clean, large hydroelectric power stations which do not qualify as an eligible renewable resource under California law.

⁴ "Unspecified sources of power" means electricity from transactions that are not traceable to specific generation sources.
