Hey Thomas,

This has been resolved. They were just looking for information on the trees they should represented in the graphics. We were able to get them what they needed.

Thanks,
Zak

Hi Jason, Zacharias,

I am responding to an old message; I am currently on medical leave until June. Was this inquiry resolved, or is any information still needed?

Thank you,

Thomas

Hi Zack,
I adding Thomas Eddie, as he may have a suggestion that aligns with their City Arborist plans.

Hey Guys,

Forwarding this question about replanting trees at fuller park depending on the railway construction impacts. From what I can tell, the redwoods Eric is referring to may be on the joint use part of the site. Not sure if this impacts tree replanting at all.

He is really just looking for what types of trees could replace the redwoods or if they have to be redwoods. Any insight is appreciated!

ZM.

Hi Zak,

Wondering if you could provide some quick input.

As part of our work on Diridon Station and associated future track approaches, we are preparing some photosims of Fuller Park.

My question for you:

If we were to do construction that affected the row of redwood trees that line the rail corridor at Fuller Park and we needed to replant trees, do you have any sense of what species of trees we might replant there?

Would it be the same?

I know this is a rather speculative question, so we can have a quick sidebar conversation today before or during our Google meeting if better. Or jump on the phone.

Thanks,
