Hi, Manjit. I understand what you are saying about the “logistics center” being an industrial use. However, to clarify, these facilities (there will likely be two) are intended as a means of increasing efficiency and reducing VMT, and they would only serve project site uses, not a wider array of users. Here is how this logistics component is described in the EIR Project Description:

To improve the efficiency of the supply chain compared to a typical grouping of unaffiliated office buildings, the proposed project would include on-site logistics operations (receiving, warehouse, and distribution) to serve the commercial uses and potentially other project uses. Under this concept, the project applicant would construct on-site logistics hubs; two hubs are anticipated, each approximately 50,000 square feet in floor area. At these logistics hubs, inbound materials and supply deliveries directed to the site’s commercial office buildings and other commercial uses could be received from off-site locations, inventoried, and stored before being distributed to on-site offices in small-scale natural gas– or electric-powered trucks. The logistics hubs are anticipated to be located within the Northern Infrastructure Zone (north of West Julian Street) and the Southern Infrastructure Zone (between West San Fernando Street and West San Carlos Streets).

Perhaps this makes the logistics operations more of an accessory use to the rest of the project.

Thank you.

Subject: RE: Admin LTA/TA - Final Comments

Hi Franziska,

We will send remaining comments on the LTA shortly. For the TA, we did not have comments until we noticed that the 100,000 SF logistics center is now included in the project description of the TA. Logistics centers are considered industrial uses and would need clearance under VMT within the TA. At this point, I do not believe there is time to add the VMT analysis and it would need it's separate clearance at a future date.

Thanks,
Manjit

Hi Manjit,

Can you send me your comments on the LTA/TA?

Hope you had a good weekend.
