Hi Nicole,

Thanks for the notes. We will work through the load differentials and reset to ensure that we are aligned on both applications. We will then agree on a pathway with respect to further analysis.

One further note to add - Google/City requested that PG&E work to synchronize analysis and applications, generally to avoid duplication and abortive work. PG&E acknowledged that when data is aligned between the applications, then existing and future analysis could be shared to support a future streamlining from a schedule perspective. (subject to waiver extension)

I hope this addition is ok, let us know if you have feedback on this point.

Kind regards

Paul

Hi All,

Below just a few notes and action items from the meeting. Attached is the load data that was presented today. Let me know if you have any questions.

Notes

- City of San Jose to perform study to assess risk, cost of service, ect to serve Google
- Aiming to present interconnection recommendation to city council around *mid-2021*
- Once load data is verified, PG&E to confirm if/what additional studies will be needed

Action Items

- Google to review/verify load info with San Jose

Google to check if there is updated data that needs to be looked at

- PG&E to send out confidentiality waiver email to Google and San Jose to support continued coordination meetings amongst all parties

Thanks!

Nicole Collette
