[External Email]

This is a good plan. Please put a hold on the hour. I see HSR will be “in town” for the Community Working Group starting at 5 pm so we know they should be available. Parks and Recreation has a special meeting with Google that same evening. Probably starts at 5 or 5:30

I still have to run it through people, but I'm pretty sure this is a good choice.

Back to you by late tomorrow.

agencies (HSR, for example) so that we can answered detailed questions about various projects.

HAHAHA!

>

> Several of us have been looking over the Google submission from the perspective of parks and trails and are seeing some conflicts with HSR and the Station plans. The vesting map even hints at decisions that the city must make about accepting certain land dedications. However, we don't recall sufficient detail on the HSR + DISC plans and options and possibilities to provide trully thoughtful input. Is there someone available for an hour to walk through some of those potentials? We're looking especially at the impacts between West San Carlos and Auzerais and the area north of Diridon Station by the Wye? Depending on the day, there's three to five of us. During the day is OK, but 4 pm or later is best to accommodate our friend with the job with no freedom.
