Subject: RE: DISC/Station/Track Footprint South end of Station - Electrical Substation
Date: Monday, February 24, 2020 2:03:40 PM

Liz:

Don't think I heard back on this?

Given Google's phasing plan, this is likely the most time sensitive issues they have related to Google from an actual final plans and first shovel in the ground perspective.

I know Friday's agenda is full, seems like this type of issue would fall in the 2020 Workplan item. Please get back to me on best way to handle. It needs some daylighting on Friday.

Thanks, Jim

Subject: DISC/Station/Track Footprint South end of Station - Electrical Substation

Liz:

In working with our City teams on the electrical infrastructure planning for the Downtown West project, questions are coming up about where the edge of the DISC project will be in that area southeast of the station/platforms. The critical issue is timing as the electrical infrastructure is the first phase of construction for the Downtown West project and as such plans for that would be some of the earliest that need resolution.

Is this something that we could incorporate into the agenda for next Friday? How does this area fit within the scope of the work underway in the next phase?

Can talk if that will help? Thanks, Jim

Jim Ortbal
Deputy City Manager
City of San Jose
