Subject: Downtown West Electric Grid and EIR, DSAP EIR

Robert:

CED (Kevin and Lori) have been working with Google on the process of having the City provide the electric service to Google.

An item of discussion relates to the electric configuration of substations and switching stations and how that is currently covered in the ADEIR and what the ultimate ideal is, and how that may need to be reconciled in same manner.

Kevin O'Connor from CED will be reaching out to you to confirm what is occurring with Google on the electric planning side, how that fits with the ADEIR, and how to ensure alignment through any addendums and final certification.

Thanks, Jim

Jim Ortbal
Deputy City Manager
City of San Jose
