Chief,

HA-1 Based on the hazardous materials definitions provided by the San Jose Municipal Code Hazardous Storage Ordinance and California Fire Code there will be some hazardous materials stored, used, disposed of, and transported on and off site. Would provide a better description that any hazardous materials used, stored, disposed of and transported on site will be mitigated by meeting the code requirements of the City of San Jose Fire Department, the San Jose-Santa Clara Wastewater Treatment Facility, the Santa Clara County Department of Environmental Health and the California Department of Transportation. For instance the batteries used for onsite generation will utilize hazardous materials.

For page. HA 3C

The project may encounter underground storage tanks that may contain unknown quantities of hazardous materials. Removal of these tanks will require obtaining closure plans and removal Hazardous Materials Storage Permits with both the City of San Jose Fire Department and Santa Clara County Department of Environmental Health.

UT-1 This project may require additional water supplies and infrastructure for fire sprinklers and hydrants.

Says no impact to response times for fire and police, etc. Just want to make sure you are aware of that portion as well.

Heidi

Hi Hector,

Do you have any comments on the EIR? I am just following up because I have yet to receive them, and they are due by COB today.

Thank you,

Shannon Hill, Planner

Importance: High

Hi Hector,

Please refer to the attached Word versions of sections for the Fire Department's review, including the project description to make sure it aligns with your understanding of the proposed project, since it has been dynamic thus far. The redline versions, if applicable, include comments made on the preliminary draft and the consultant's responses.

Also, please scan the sections included in the compiled PDF of the EIR at the following link to determine if any additional sections require your team's review, and I'll forward sections to you as necessary: <http://www.sjcity.net/index.aspx?nid=773>.

Instructions for providing comments and edits in tracked changes and compiling comments into one version of each section before submitting final comments to David Keyon and I were provided in the internal circulation email. Additional information about upcoming coordination meetings, etc. is also provided in that email.

Please distribute this email to additional contacts, as necessary, and cc me on that email for future reference.

Thanks!

Shannon Hill, Planner
