Hi Shannon,

We don't have a Park Lots category in our layer. However, we do have a lot of lands not necessarily City parks for landscape and reference purposes.

I recommend the consultant just filter and use the 3 parks specified for the shade analysis.

Subject: Downtown West: Shade/Shadow (GIS Data for Parks)

Hi Nolan,

We forwarded the GIS data for parks to our environmental consultant, and there is a layer in the shapefile called "Park Lots," which are shown in pale yellow on the attached map. Could you please clarify what "park lots" means and if these areas are considered City parks?

We need the answer to this question ASAP, as the consultant needs to include parks in the project area in their shade/shadow analysis, and we are under a major time crunch to get the analysis done for the environmental document.

Thanks!
