Hi Liz,

Thanks for getting back to me, and no need to apologize for getting behind. I think we are all there and all I'm doing is adding to it.

It's on the calendar, but please let me know if timing of your work becomes a challenge and we can adjust.

Take care!

Hi Kevin,

Apologies for my delayed response here! Shucks, I got a bit behind on emails last week.

We're still evaluating what we will have and by when relative to new data on the F5 parcel. I have gotten a schedule from the designer that we're evaluating but I hope to soon share more details. Makes sense to me to put time on the calendar to check in.

Many thanks for your help on this!
Best,

Liz Scanlon

Hi Liz,

I hope you're doing well.

I'm checking in to see if you have any thoughts or concerns about the information requested from Google or any information requests of them, and to see if you think having a follow-up meeting this week is realistic and/or critical from your perspective.

Let me know and take care!

Hello Paul,

Thank you for following up with your summary of the action items coming out of last week's meeting. I've copied Liz Scanlon from Kimberly-Horn so that she can share and process the information with her design team. I've also included CSJ staff who are integral in the DISC project.

To all: If there are additional items to be captured, please submit.

Lastly, to all regarding a follow-up meeting during the week of April 6, I'm glad to arrange that and will ask that Paul/Cindy and Liz provide to me in the next few days some timeslots days that would work for your respective key staff. I will coordinate with City staff and send out a meeting invitation.

Thanks.

Kevin O'Connor

[External Email]

Hi Kevin,

Thanks again for arranging the meeting last week, it was a productive discussion. There was a couple of key follow up items I have listed below. Can you please forward on to the respective teams for action.

- DISC to provide the latest work-in-progress (WIP) rail alignment profiles, presented at the meeting for co-ordination purposes.
- DISC to provide details/confirmation of the allowances and assumptions behind rail alignment profiles for understanding/co-ordination.
- DISC to provide overview of how the F5 interface will be addressed, relative to ROW/TCE.

We are hoping that the information above can be issued as early as possible next week - with a target of having a follow-up discussion within the week of Monday the 6th of April.

We can discuss further at our weekly meeting on Wednesday.

Kind regards

Paul
