Subject: DW development and electric service processes

Hello,

I'm going to forward you the invitation from Lori Mitchell to this week's Energy Working Group meeting with Google on Wednesday, 4/15 at 3-4 pm and ask that you or one or more of your knowledgeable colleagues participate.

During the meeting, we will be reviewing the major steps, milestones and schedules for the process of providing City owned and operated Electric Service to the project and the project development/entitlement process. The purpose of this discussion will be to compare and align the two processes so that the City is able to provide power to the project as needed. Since I'm only really familiar with the electric service interconnection process and don't know much about the development process or pathway to entitlement, I think it would be helpful to have some or all of you in the conversation.

Please let me know if you will be able to participate and respond accordingly to the invitation from Lori Mitchell.

Kevin O'Connor
Energy Resilience Coordinator
