Subject: RE: DISC/CoSJ - F5 Co-ordination

Hello Paul,

Thank you for following up with your summary of the action items coming out of last week's meeting. I've copied Liz Scanlon from Kimberly-Horn so that she can share and process the information with her design team. I've also included CSJ staff who are integral in the DISC project.

To all: If there are additional items to be captured, please submit.

Lastly, to all regarding a follow-up meeting during the week of April 6, I'm glad to arrange that and will ask that Paul/Cindy and Liz provide to me in the next few days some timeslots days that would work for your respective key staff. I will coordinate with City staff and send out a meeting invitation.

Thanks.

Kevin O'Connor

Subject: DISC/CoSJ - F5 Co-ordination

[External Email]

Hi Kevin,

Thanks again for arranging the meeting last week, it was a productive discussion. There was a couple of key follow up items I have listed below. Can you please forward on to the respective teams for action.

- DISC to provide the latest work-in-progress (WIP) rail alignment profiles, presented at the meeting for co-ordination purposes.
- DISC to provide details/confirmation of the allowances and assumptions behind rail

alignment profiles for understanding/co-ordination.

- DISC to provide overview of how the F5 interface will be addressed, relative to ROW/TCE.

We are hoping that the information above can be issued as early as possible next week - with a target of having a follow-up discussion within the week of Monday the 6th of April.

We can discuss further at our weekly meeting on Wednesday.

Kind regards

Paul
