Subject: Google District Systems-Infrastructure Team Updates
Date: Tuesday, January 28, 2020 8:52:22 AM

District Systems and Infrastructure Team:

I just wanted to share some updates relevant to our team (mostly from the program managers meeting yesterday):

Regional Stormwater Infrastructure

- As follow up to last Thursdays meeting w/ Google, Matt Cano is setting up a call with Google staff (coordinated through Kim/Alexa) to discuss potential locations within the Google boundary for further evaluation; I'll provide another update to the team as we make progress - Please call me if you have questions on this and I can provide full details

Google EIR

- Thanks to every for providing their comments (even if it was "no comment") on the ADEIR project description that Shannon shared
- Shannon noted that the following will not be included (in either the Google EIR or DSAP Amendment EIR) so this means that, if needed, these may require future CEQA clearance:
 - Changes from Google submitted energy infrastructure, e.g. if City/SJCE would like to move the substation location
 - Changes from Google submitted stormwater infrastructure, e.g. if we take a regional approach

Future Meetings

- Team Meetings: We'll continue to schedule our team meetings on an as needed basis (so let me know if you feel there are major issues to work through)
- This Thursday (1/30) Google-City meeting: We don't have any agenda items that I know of for this Thursday's meeting so you don't need to attend for our team topics but I'll let you know if anything comes up in the finalized agenda.
- 2/3 All-hands Meeting: We've been asked to draft a 3-4 bullet slide on major items pending by COB this Thursday (1/30) for a 1 min. update from our team at this meeting. I'll send a draft that people can comment on by COB today for review by COB tomorrow so we can make that timeline.

If there's anyone you feel is missing from this email list, please let me know as I'll continue to use it for internal updates.

-Julie
