Hi,

I've attached my meeting notes from the Google meeting yesterday.

Thanks,

Larissa

**PARKS, RECREATION &
NEIGHBORHOOD SERVICES**

December 12, 2019 – Google Water Meeting

Utilidor:

- Most will be on private land
- One will be inside the San Fernando bridge near Los Gatos Creek trail (no graphic included in the power point)
- Next steps: Google will show a more in-depth crossing in a few months

Recycle water and Stormwater:

- They understand private and public water cannot mix
- Deputy Director of Public Works expressed interest in storm drain trunks adjacent to parks
 - Connection between public parks and public storm lines/mains
 - City can help with measure T bonds
 - Google will look into it
- Possibility of Public parks for regional green infrastructure
 - Need to determine what parks and how it will impact them
 - Need infrastructure plans and design guidelines
 - Google is concerned with timing to add it to the EIR

PRNS Comment	Draft Response	When will it be addressed?	Where will this be addressed?
A revised Master Stormwater Control Plan and Grading Plans should indicate if any proposed public lands are in a floodplain and be revised to have separate Drainage Management Areas for lands to be dedicated to the City. Private stormwater should not flow, be collected, or treated on public lands.	The revised master plans will indicate floodplains, and will show separate DMAs for private and public lands. Stormwater runoff will be designed and not cross property lines.	Mid-March 2020 Next Draft Planning Application	Planning Application Infrastructure Plan
The Site Plan, Grading and Drainage, and subdivision plan sheets should show dimensional details of any potential encumbrances on land proposed to be dedicated to the City such as (but not limited to) a) Emergency Vehicle Access b) Riparian Corridor and other Setbacks.	Noted. Dimensions will be shown on the listed plans,	Mid-March 2020 Next Draft Planning App	Planning Application
