[External Email]

Hi All,

As requested during our call yesterday, you can find the following documents in this [folder](#).

1. Blown up before/ proposed after figures for the SP Depot and Water Company historic boundaries
2. Updated E1 DWDSG Standard (requested by ESA team)
3. Updated historic resources figure that will be incorporated in the DWDSG
4. Relocation Feasibility memo for the buildings that we're proposing to demolish from Garden City for Mitigation Measure CU-1
5. Receiver Site memo for the buildings that we're proposing to demolish from ARG for Mitigation Measure CU-1
6. 40 South Montgomery Relocation Memo from Garden City

A few other confirmations / clarifications:

- D1 would not require a height reference (or DDG Stepback) on any facade because it does not directly face or abut historic resources. This would be true in either the DWDSG and the DDG.
- 40 South Montgomery will be relocated 30 feet. There was some back and forth on whether it was 30 or 40 feet.

The DDG / DWDSG historic adjacency comparison will follow in a subsequent email. We also heard the need to see the entire DWDSG chapter as soon as possible. We're coordinating internally and will let you know soon when you can expect this draft.

Please let us know if you need any additional information or have concerns.

Best,  
Victoria
