Hi guys,
Happy Friday!

I can't seem to find any information about the original HP permit or the adjustment (see below email).

This is related to the Google project and the San Jose Waterworks building.

Do you have any information on the status of the permits they cite?

Would be so very appreciative of any information.

Thank you!

[External Email]

Dana –

Congratulations on the new position and welcome to the Downtown West team! We are trying to wrap up a few loose ends including the status of work at the San Jose Water Works site.

Can you provide an update on the permit status for the exterior modifications to 374 West Santa Clara Street noted below (Permit 2020-117959) as well as the permit for demolition of the non-historic additions to the building (Permit 2019-139685)? We are including discussion of these permits in our Cultural Resources chapter for the Downtown West project.

Regards,

Becky Urbano

Sorry for the delayed response. According to the City's permit [website](#), the HP permit for exterior alterations, including "replacements/openings for windows on main property," has been applied for but is not yet approved (status = "Pending") – see screen shot below. Approved permits (saved [here](#)) include for hazardous materials remediation and interior non-structural demolition, along with demolition of the non-historic buildings on the SJW site.

Karl –

When you get a moment, can you point me toward the project info for the current work at 374 West Santa Clara? We have general info in the cultural chapter that I need to update. Hillary said they plan to replace windows and whatnot. We have to separate that work from the Downtown West work as thoroughly as possible.
