**Subject:** ESD Comments on Maintenance Matrix Draft  
**Date:** Tuesday, March 9, 2021 12:17:48 PM

---

Hi Victoria and Duanne,

Here are additional comments on the Maintenance Matrix from ESD:

- 19 – ESD believes this line item is Public Litter Containers (PLCs). These are currently serviced and maintained by ESD/IWM, not PW so that edit should be made.
- 20 – Same as 19, but ESD isn't clear why we'd have non-standard. Within the public right of way, we'd want standard. The hauler that collects the material needs some consistency for ease of collection.
- 56B - ESD does not believe it has ever discussed and is not willing to entertain the concept listed in 56B, under the responsibility column if it relates to ESD. Two options have been discussed with Google: connect to SBWR or build a "district system". 56B appears to be a new item, i.e. build a completely separate district system and have City/SJWC responsible.

Thank you!

**Vivian Tom**
