John,

This is correct. Per our previously discussion, SJC's noise database showed five multifamily residential buildings having zero noise complaints and one multifamily residential building having twelve noise complaints in the last ten years.

Thanks,
Ryan

Ryan,

I wanted to double check per our previous discussion when you checked the database, for construction of multifamily residential buildings with outdoor patios and/or outdoor activity areas there were six such existing buildings in Downtown within the 65 dBA CNEL airport noise. In the last ten years, five of these multifamily residential buildings reported no noise complaints and one building nearer to the airport reported a total of twelve complaints.

Best,

Tong (John) Tu
