And now for some really bad news. I just heard from a colleague with a daughter in Google's real estate planning department. There is serious discussion about scuttling the downtown San Jose campus plans. The extraordinarily long time to even start building and complete (first buildings no sooner than 2024 and complete by 2030), coupled with the deteriorating homeless problems and living conditions are creating angst with the executives for any tupe of San Jose or SF expansions. They are going to focus on current campus along with NYC Hudson Yard and Chicago West Loop campuses that have been stood up in no-time and have much more desirable living conditions. They feel the problems are becoming intractable here. If this development bombs this will be the biggest stain on Licardo's legacy for issues that were completely within our ability to handle.

Well stated! I've lived and paid more than 10k in property taxes per year! In addition, I've paid tax from my paycheck for every week, day, month, year. Where is this money going? Had the day off work walked the neighborhood with my dog. The river has pollution in the trees, water and surrounding area. We are afraid to walk the Guadalupe trail with kids due to homeless population along the pathways. Our car has been broke in our garage has been burglarized. Our friendly mom and pop businesses are being assaulted and closing down. If it's like this now how will it be in 1, 5 or 10 years. I've had lots of discussions with others who feel the urge to move to another State to feel safe again. Very Sad. Willow Glen is falling apart!

You really don't know these folks if you think that they're all the same.

It has been said that the definition of insanity is doing the same thing over and over and expecting different results.

Look at the list of San Jose Mayors from 1967 to present day. Do you notice anything similar in all the names?

Sam Liccardo (D)  
Chuck Reed (D)  
Ron Gonzales (D)  
Susan Hammer (D)  
Tom McEnery (D)  
Janet Gray Hayes (D)  
Norman Mineta (D)  
Ron James (D)

So many people complain about the failed policies that give us the problems with which we are now faced, and yet they vote for basically the same person with the same policies. The only

thing that changes is the name and the face. You want something different, try voting different. Just what have you got to lose? I for one think that, giving one party 53 years to fix something and them failing miserably is way more than sufficient chance. I think we need to go a different direction.

I absolutely agree 100%!!!!!!

We are all witnessing the filth that our leaders are allowing to build up in every crevice, under every bridge, and at the base of every creek bed in what was once a beautiful bay area city.

It is past time to act!

Nothing says "Welcome to San Jose, the Tech capitol of the USA" more than an entire garbage truck worth of trash tossed under the freeway underpass into our city - NOT!

This mess has been growing in size over the past few weeks. So unacceptable!

That stretch of Meridian was already shabby

looking, with poor landscape (No curb appeal), but with the addition of tents/bicycles/shopping carts/etc on the east side and the huge growing pile of garbage on the west side, it is just a breeding ground for rodents and disease.

Expressway

This is not to be tolerated Dev. It is bad enough that these people take over sidewalks and parks and neighborhoods, when there is a direct threat to our Citizens this goes beyond our tolerance. As an elected city council member it is your job to ensure this is cleared up immediately and not allowed to happen again. Jonica Dow
