Subject: Join us for our next webinar | Google's Third Decade of Climate Action
Date: Friday, May 28, 2021 2:26:36 PM

[External Email]

Hello from Google!

We're

inviting state and local elected officials and Departments of Environment (and staff) to our upcoming webinar:

***Our Third Decade of
Climate Action: Realizing a Carbon-Free Future.***

-

**Thursday,
June 10th**

-

1:00pm
ET - 2:00pm ET | 12:00pm CT - 1:00pm CT | 10:00am PT - 11:00am PT .

-

[REGISTER
FOR THE WEBINAR](#)

During

this event, we will:

-

Discuss
how our
[Environmental Insights Explorer](#)
helps provide
[state and local governments](#)

around the world with actionable insights on building and transportation emissions as well as solar rooftop potential, and how we're committed to help cities around the U.S. take action on climate change

-

Share
how we're building sustainability into our core products to help give everyone, everywhere the opportunity to live more sustainably.

-

Share
how we've matched 100% of our electricity consumption with renewable energy, our plans to run on 24/7 carbon-free energy by 2030, and how we're working to help transform electricity grids in

the communities where we operate.

- We want to hear from you as well, so we'll be taking live Q&A during the session. To make sure that we get to as many questions as possible, please submit your questions during registration.

Sustainability

has been a core value at Google since our founding in 1998. By the end of our first decade in 2007, we were the first major company to be [carbon neutral in our operations](#).

Since then, across all of our products, every search, Gmail sent, YouTube video streamed, has had zero carbon footprint from our data centers. At the end of our second decade, we became the [largest annual corporate purchaser of renewable energy](#) in the world and the only company of our size to match 100% of our operation's annual electricity consumption with renewable energy for four years in a row.

In

our

[third decade of climate action](#),

we are going even further: to help build a carbon-free future for everyone. By 2030 Google we're aiming to run our business on carbon-free energy everywhere, at all times. And, we are taking action far beyond our own operations, by creating tools and investing in technologies to help everyone move towards a carbon-free world. We've committed to help 500 cities reduce a gigaton of carbon, and to offer 1 billion people new ways to live more sustainably through our core products.
