Address: 630 W SAN FERNANDO ST

COMMENTS FOR PARCEL: One 5,000-gallon fuel oil UST was removed from the site in 1989. Impacted soil was excavated and removed. Some residual petroleum hydrocarbon-impacted soil was left in place and was expected to naturally attenuate over time. No threat to human health was determined, and the site was closed by the Santa Clara Valley Water District on 7/31/2001.
